

TO: All Potential Offerors

SUBJECT: NASA Postdoctoral Program (NPP) Contract NNH15CO48B Summary

The current contract, NNH15CO48B, currently consists of five active task orders. Two prior task orders in support of Solar System Exploration Research Virtual Institution (SSERVI) and Space Technology Mission Directorate (STMD) expired due to lapses in funding. There is, or was, one task order to support each Funding Activity. Funding Activities are: 1) Science Mission Directorate (SMD), 2) Astrobiology, 3) Human Exploration and Operation Mission Directorate (HEOMD), 4) Aeronautics Research Mission Directorate (ARMD), 5) SSERVI, and 6) STMD. Currently active Funding Activities/task orders are: SMD, Astrobiology, HEOMD, ARMD, and SSERVI.

The original Base Contract NNH15CO48B clauses are being provided in the e-library along with Modification #7 which corrects a typo in the effective ordering period, and Modification #8 which contains the current Attachment A: Statement of Work. The rest of the modifications to NNH15CO48B are not being provided as they deal with non-substantive or Contractor proprietary modifications, such as incorporating rate matrices or Information Technology Security Management Plan. The current statement of work provided, captures previous substantive modifications.

The SMD task order, NNH15CO66T, is the only task being provided within the e-library as the task orders are basically identical with respect to the work to be accomplished and the SMD task order makes up most of the umbrella contract's (NNH15CO48B) estimated Cost plus Fixed Fee and funding. Modifications to this task order not being provided in the e-library include, incremental funding, de-obligations, and modifications to extend the period of performance.
