

Statement of Work

Item	Description	Applicable Contract Function
1	Performance Requirements	Implementation Phase Services – Related Discipline Engineering
Performance Requirements		Delivery Schedule:
<p>Provide PP experts to serve on and/or support review committees, HQ PP teams, and international PP groups. Provide technical and strategic consultation to the PPO. Provide expertise to proposal efforts, as required.</p> <p>2. Serve as the NASA-wide bioburden assay verification facility in support of NASA Missions and NASA PPO (using the GSFC Planetary Protection Lab). Maintain and update the GSFC Planetary Protection Lab (PPL), to support NASA Missions and the HQ PPO.</p> <p>3. Evaluate interactions between the fields of Contamination, Coatings, and Planetary Protection.</p> <p>4. Perform PP new technology research and verification in support of NASA Missions and the PPO.</p> <p>5. Maintain and update the NASA Bioburden Accounting Tool, in support of the PPO (already developed by GSFC).</p> <p>6. Procure necessary PP equipment and supplies for the PP Lab as directed.</p> <p>7. Perform travel, as required, in support of NASA PP activities.</p> <p>Note this is a task extension mod with minimal increase in costs to account for inflation, administration, and other recurring overhead as allowed for in the MIST services contract</p>
