

Statement of Work

Item	Description	Applicable Contract Function
1	Mechanical Systems Engineering support	Pre-Formulation and Formulation Services: Candidate, Feasibility and Systems Definition Studies
Performance Specifications		Delivery Schedule:
Provide mechanical systems engineering support and mechanical design support for the OST decadal survey proposal. The task requires a mix of engineering and design support.		9 Month(s)
Perform an initial assessment of the current state of the mechanical design to determine the required level of engineering and designer support required to complete the proposal. Recommendations are to be presented within 2 weeks of contract award.		2 Week(s)
Attend and participate in proposal meetings as requested, work with other engineering disciplines to complete the proposal design and participate in the Integrated Design Center (IDC) studies as the customer mechanical representative.		9 Month(s)
Deliver a final design concept in the form of a CAD model and other final products requested by the project at the end of the proposal period.
