

Questions

What are some critical initiatives/improvement opportunities?

Answers

Building Cyber security in, not bolting it on
Shift in mindset from A&A flavor to understanding system and mission capabilities and functions
End-to-end, mission/system approach (as opposed to separate component-based approach); “the year of integration” (integrated security picture)
Cloud-based solutions– major area of growth and need of support
Need more Cloud developers experienced in deployment/migrations to the Cloud
MBSE/MBSA, model-based testing – major area of growth
Ability to telework – presents an opportunity to utilize individuals who otherwise would not have had that opportunity
Risk Management – can do a better job of identifying and elevating programmatic risks and assessing impacts – potential training opportunity
