

SU-20.1 REQUIREMENTS

1 INTRODUCTION

These are the ECS Stories delivered in SU-20.1 that are identified as requirements in the DAS and SDPS Jira projects.

2 STORIES

2.1 DAS

ID	Title	Status
ECS-STORY-11	As an End User, I would like Data Access Services for ATL16 product	Verified internal
ECS-STORY-12	As a DAAC Operator, I would like to resubmit shapefile requests from the DA-GUI.	Completed
ECS-STORY-13	As a DAAC user, I do not want HEG to create an output for 1D bands in GeoTIFF format.	Verified internal
ECS-STORY-14	As a DAAC user, I do not want the 3D image bands to be individually selectable in the form.	Verified internal
ECS-STORY-15	As a DAAC user, I want subsetting services for GEDI02_A products.	Verified internal
ECS-STORY-16	As a DAAC user of the GEDI01B product, I do not want txwaveform or rxwaveform returned when BBOX is out of data range.	Verified internal
ECS-STORY-17	As a DAAC user of the GEDI01B product, I do not want surface_type(2D dataset) returned when BBOX is out of data range.	Verified internal
ECS-STORY-18	As a DAAC user, I want to reformat CF compliant SMAP granules as HDFEOS5 with MaskFill.	Verified internal

2.2 SDPS

ID	Title	Status
ECS-STORY-19	As an operator, I would like a utility that allows me to restrict specific granules in a collection	Verified internal
