

REL-20.2 REQUIREMENTS

1 INTRODUCTION

These are the ECS Stories delivered in REL-20.2 that are identified as requirements in the DAS and SDPS Jira projects.

2 STORIES

2.1 DAS

ID	Title	Status
ECS-STORY-5	As a DAAC user of the GEDI02B product, I want to do spatial subsetting using BBOX.	Verified internal
ECS-STORY-6	As a user I would like FormUpload script to retrieve launchpad certificate, password and CMR endpoint from BMGT so Form Upload can perform launchpad authentication	Verified internal
ECS-STORY-8	As a GEDI Subset user, I want spatial subsetting based upon a selected (restricted) set of coordinate variables	Verified internal
ECS-STORY-9	Update GEDI Subsetter configuration to properly subset PGap_Theta_Z, as waveform related datasets	Verified internal
ECS-STORY-10	As a DAAC user of ICESat2 products, I want subsetting services to apply Super Group Rules	Verified internal
ECS-STORY-24	As a DAAC user, I want the forms to have custom messages.	Verified internal
ECS-STORY-25	As a DAAC operator, I need forms to be configurable using XSLT	Verified internal
ECS-STORY-26	As a DAAC operator, I need a configuration utility to configure the custom messages in the forms.	Verified internal
ECS-STORY-27	As a DAAC user, I want NoMatchingData results to be marked as complete, not failed.	Verified internal
ECS-STORY-28	As a DAAC operator, I want an ESI Subagent job result of 'No Matching Data' to be recorded as complete, not a job failure	Verified internal
ECS-STORY-29	As a DAAC user, I want specific streaming services response codes based on the processing result.	Verified internal
ECS-STORY-30	As a DAAC user, I want to perform polygon subsetting for SMAP L1/L2 products.	Verified internal

2.2 SDPS

ID	Title	Status
ECS-STORY-7	As an ECS DAAC, I will need to create Launchpad service accts to support BMGT Launchpad authentication for CMR connections	Completed
